RE: Huguenot Neighborhood Traffic Calming Study
Date: September 23, 2019
Copy: Scott Dunn, AICP, PTP (TG)

Timmons Group has prepared an assessment of the Huguenot and Westchester Neighborhoods to best determine the location for potential traffic calming improvements within the study area and identify potential solutions for a safer, more accommodating neighborhood. The study area is generally bounded by Huguenot Road, Cherokee Road, the Stony Point Road/Evansway Lane/Cedar Grove Road/Croatan Road corridor, and Old Gun Road, as shown on Figure 1.

Background & Site Visit Information

The study area consists of multiple streets within the Huguenot and Westchester Neighborhoods, including the Stony Point Road/Evansway Lane/Cedar Grove Road/Croatan Road corridor, Pitaway Drive, Traylor Drive, Garfield Road, Duryea Drive, Westgate Drive, and Hobby Hill Road.

The Stony Point Road/Evansway Lane/Cedar Grove Road/Croatan Road corridor, Duryea Drive, and Westgate Drive are classified as urban major collectors. The remaining roadways within the neighborhood are classified as urban local roads and serve primarily residential development. All roads within the study area have a posted speed limit of 25 MPH, with the exception of Stony Point Road between Huguenot Road and The Sabot School, which has a posted speed limit of 30 MPH.

In addition to the noted residential development in the study area, there are also five (5) schools; four (4) are private and one (1) is public. The following schools are:

1. J. B. Fisher Elementary (9-4)
2. St. Michael's Episcopal (8-3)
3. Trinity Episcopal (8-3)
4. Sabot at Stony Point (9-12)
5. Huguenot UMC Preschool (9-1)

Generally, the aforementioned schools have AM peaks that overlap with the adjacent streets and PM peaks that occur mid-afternoon before the typical 5:00 – 6:00 pm peak hour.

The major ingress and egress points to the neighborhood are through the Stony Point Road/Evansway Lane/Cedar Grove Road/Croatan Road corridor, Huguenot Road, Old Gun Road, and Cherokee Road. Timmons Group performed field visits in April 2019 to review the study area and observe existing conditions/operations.

The majority the roads within the study have a typical section width of 20' to 24', with two (2) travel lanes. The roadway widths meet the minimum standards outlined in the City of Richmond's *2018 Better Streets Guidelines*. The majority of the street corridors utilize shoulder and ditch. In addition, there are deep ditches on many portions of the roadway that are within 2' of the travel way.

Sight Distance

The VDOT *Road Design Manual* requires a minimum of 280' of intersection sight distance for a roadway with a 25 MPH design speed. The following intersections do not meet the minimum sight distance requirements:

- Stony Point Road/Evansway Lane/Cedar Grove Road/Croatan Road
 - Ragsdale Road – Sight Distance Left
 - Westgate Drive – Sight Distance Right
 - Oldham Road – Sight Distance Left

- Hobby Hill Road between Traylor Drive and Hastings Drive
 - Vertical curve on Hobby Hill Road is close to obscuring sight distance for intersection of Hastings Drive

- Duryea Drive
 - Margate Drive – Sight Distance Left

There are no sidewalks, crosswalks, or bike lanes along the study area corridors. During the field visit, there were limited pedestrians traveling along the corridor, using the ditches and shoulder of the roadway. One (1) bicyclist was observed.

Existing Traffic/Speed Data

Existing 24-hour vehicular tube counts were collected on key streets at 12 locations within the study area. The data collection locations are shown on Figure 2 and are as follows:

1. Croatan Road, between Cherokee Road and Apache Court;
2. Cedar Grove Road, between Apache Court and JB Fisher Elementary School;
3. Cedar Grove Road, between JB Fisher Elementary School and Garfield Road;
4. Evansway Lane, between Garfield Road and Stoney Point Road;
5. Stoney Point Road, between Evansway Lane and Huguenot Road;
6. Pitaway Drive, between Cherokee Road and Wainfleet Drive;
7. Wainfleet Drive, between Trinity Episcopal and Apache Road;
8. Traylor Drive, between Cherokee Road and Apache Road;
9. Traylor Drive, between Apache Road and Garfield Road;
10. Hobby Hill Road, between Garfield Drive and Hastings Drive;
11. Duryea Drive, between Old Gun Road and Margate Drive; and
12. Garfield Road, between Traylor Drive and Cedar Grove Road.

The data was collected over a 24-hour period from 12:00 AM March 28, 2019 to 12:00 AM March 29, 2019. For your convenience, a copy of the count data is contained in Appendix A. A review of the vehicle speeds is shown in the following three (3) tables.

Table 1: Stony Point Road/Evansway Lane/Cedar Grove Road/Croatan Road Speed Data

Average Speed	27 MPH	25 MPH	27 MPH	28 MPH	23 MPH	25 MPH	24 MPH	24 MPH
Percent of Vehicles >25 MPH	62.6%	49.3%	66.0%	69.7%	33.8%	48.6%	35.3%	39.3%
10 MPH Pace Speed	21-30 MPH	21-30 MPH	21-30 MPH	21-30 MPH	21-30 MPH	21-30 MPH	21-30 MPH	21-30 MPH
Percent of Vehicles in Pace	69.8%	67.1%	78.1%	71.2%	69.8%	72.4%	79.7%	79.1%

Table 3: Hobby Hill Road/Duryea Drive/Garfield Road Speed Data

Location	Hobby Hill Rd – Garfield to Hastings		Duryea Dr – Old Gun to Margate		Garfield Rd – Traylor to Cedar Grove	
	NB	SB	NB	SB	WB	EB
85th Percentile Speed	27 MPH	25 MPH	33 MPH	34 MPH	29 MPH	28 MPH
95th Percentile Speed	29 MPH	28 MPH	35 MPH	38 MPH	33 MPH	31 MPH
Average Speed	23 MPH	22 MPH	29 MPH	30 MPH	26 MPH	25 MPH
Percent of Vehicles >25 MPH	29.7%	17.2%	78.6%	83.0%	58.5%	39.8%
10 MPH Pace Speed	21-30 MPH	16-25 MPH	26-35 MPH	26-35 MPH	21-30 MPH	21-30 MPH
Percent of Vehicles in Pace	83.6%	76.2%	73.1%	71.4%	78.1%	84.4%

Following a review of the speed data collected at the 12 count locations, these conclusions were reached:

- Stony Point Road/Evansway Lane/Cedar Grove Road/Croatan Road Corridor
 - The section between Cherokee Road and Apache Road does not experience significant speeding (i.e. >10 MPH over the posted speed). The winding nature of the roadway contributes to the pace of traffic within 5 MPH of the posted speed limit.
 - The section between Apache Road and Sabot shows 85th percentile speeds in excess of 10 MPH over the posted speed limit in each section. All four (4) sections have a pace that exceeds the posted speed limit by 10 MPH and over 70% of traffic is traveling at that pace.
- Pitaway Drive, Wainfleet Drive, Traylor Drive, Hobby Hill Road, and Garfield Road each have pace speeds of 30 MPH or less and do not experience 85th percentile speeds that exceed 30 MPH, with only two (2) exceptions. A majority of traffic accessing these roadways is travels between 21 and 30 MPH.
- Duryea Drive experiences 85th percentile speeds of 34 MPH and a pace speed of 26 to 35 MPH, which indicates that a majority of traffic are traveling at approximately 10 MPH over the posted speed limit.

The AM peak, PM peak, and daily volumes on each roadway are shown on Figures 3, 4, and 5 for the twelve count locations within the study area. The PM peak occurs at approximately 3 PM and corresponds to the release of the schools within the study area. Based on this information, the following conclusions are offered:

- A majority of traffic that accesses the area utilize the Stony Point Road/Evansway Lane/Cedar Grove Road corridor. This provides direct access to the Sabot School at Stony Point and J. B. Fisher Elementary School and accommodates southbound traffic headed toward St. Michael's Episcopal and Trinity Episcopal.
- A second focal point for traffic is traveling from Cedar Grove Road to Garfield Road to Traylor Road for access to St. Michael's Episcopal.
- Pitaway Drive serves as the primary access route Trinity Episcopal from Cherokee Road.
- There is cut-through traffic utilizing Margate Drive between Garfield Road and Apache Road to avoid the intersection of Garfield Road/Traylor Drive.
- During field visits, minimal volumes utilized Hastings Drive, Duryea Drive, Kettering Drive, and Westgate Drive.

Crash Analysis

Timmons Group reviewed the six-year crash history of the neighborhood study area. From January 1, 2013 to December 30, 2018, there were 17 crashes within the study area.

- Two (2) crashes occurred at the Cherokee Road/Croatan Road intersection;
- Two (2) crashes occurred at the Cherokee Road/Traylor Drive intersection;
- Two (2) crashes occurred at the Croatan Road/Apache Road intersection;
- Two (2) crashes occurred at the Cedar Grove Road/Garfield Road intersection;
- Two (2) crashes occurred at the Evansway Lane/Westgate Drive intersection;
- One (1) crash occurred on Evansway Lane;
- Three (3) crashes occurred at the Duryea Drive/Margate Drive intersection;
- One (1) crash occurred on Duryea Drive; and
- Two (2) crashes occurred on Westgate Drive.

There are no clear patterns or time periods that coincide with the crashes found during the review. Of the 17 crashes, eleven (65%) were property damage only crashes. In addition, nine (9) of the 17 crashes, or approximately 50%, were fixed object crashes where the vehicle ran off the road.

The crash review does not indicate that speed was a factor in 15 of the 17 crashes within the study area. There were no noted pedestrian or bicycle crashes reported within the study area.

Traffic Calming Improvement Recommendations

The following improvement options are presented as potential solutions to the noted speeding and traffic volume concerns along the key streets within the Huguenot and Westchester Neighborhoods.

Recommendation 1 – Speed Tables for Lowering Vehicle Speeds

This option proposes to install speed tables to introduce vertical deflection and slow vehicle speeds. Speed tables are similar to speed humps except they are designed to incorporate a flat table section to provide an overall gentler transition than a speed hump. The top flat area is sized to accommodate the largest emergency vehicle wheelbase that services the area. Speed tables are placed mid-block. The FHWA indicates an average reduction in operating speeds of approximately 7-9 MPH for speed tables.

To address the noted locations within the study area that are experiencing speed issues, it is recommended to install seven (7) speed tables. The speed tables should be installed at the following locations:

1. Cedar Grove Road, between Oldham Road and Twin Valley Road;
2. Cedar Grove Road, between Merrimac Road and Garfield Road;
3. Evansway Lane, between Hobby Hill Road and Westgate Drive;
4. Evansway Lane, between Ragsdale Road and Klondike Road;
5. Stoney Point Road, between Domino Road and Whitehorse Road;
6. Duryea Drive, between Merrigan Road and Epsilon Road; and
7. Garfield Road, between Garden Road and Cedar Grove Road.

The location of the seven (7) speed tables are shown on Figure 6.

Given that there are painted crosswalks on Cedar Grove Road and the intersection at Twin Valley Road and at Lochinvar Drive, it is possible to install a raised crosswalk in place of a speed table. The number of pedestrians utilizing the pedestrian crosswalks will dictate whether this is a viable alternative. No pedestrians were observed using the crosswalks during the field visit.

Installation of a speed table along the corridor will require additional survey/GIS and engineering efforts to complete the required design and address drainage impacts and other concerns; this will have an approximate cost of \$25,000. The typical cost for a speed table is approximately \$15,000, assuming there are no drainage issues or other constructability issues.

Recommendation 2 – Designation for Additional Fine for Speeding

As noted in the report, there are multiple locations within the Huguenot and Westchester Neighborhoods that have experienced speeding in excess of 10 MPH over the posted speed limit of 25 MPH. In these areas, the installation of “Additional \$200 Fine Signs”, in conjunction with neighborhood traffic calming installations, or as standalone signs, are recommended as another method to disincentivize drivers from speeding.

The “Additional \$200 Fine Signs” would allow for an additional \$200 fine for speeding on residential streets and are intended to attract the travelling public’s attention. These signs would be installed in conjunction with the posted speed limit signs and placed at the beginning of each roadway section in each travel direction where the higher fines apply. At least 200 feet of visibility should be provided approaching the sign and at least 100 feet between any other signs.

This treatment has been applied at other locations within the City of Richmond, notably on Cherokee Road between Huguenot Road and Forest Hill Avenue.

Advantages to the installation of the higher fines signage includes (1) there are limited impacts to emergency vehicles, (2) the cost is lower than other options, and (3) the option is a recognized traffic calming technique. The disadvantages are (1) there is no physical change to the roadway that will alert drivers to the higher fine, therefore, the sign may not impact vehicle speeds. In addition, the usefulness of the higher fine is tied to enforcement, which cannot be controlled by this recommendation.

Installation of the “Additional \$200 Fine Signs” is approximately \$250 per sign and can be installed at all locations that the City authorizes the use of the higher fines.

Public Meeting

Public outreach and participation have added a much-needed component to the evaluation and decision-making process. Since residents typically have first-hand experience with the daily transportation problems, their input is invaluable.

To ensure the study team had the benefit of this information, a public meeting with local residents will be held to discuss the initial assessment and proposed solutions.

City of Richmond Staff and representatives from Timmons Group attended a public meeting held by Councilwoman Larson on Tuesday, July 23, 2019 at Huguenot High Community Center from 6:00 PM to 8:00 PM.

The public meeting focused on the goals and objectives of the traffic calming study along with various improvement alternatives that had been considered by the Timmons Group and the City of Richmond. Citizens were (1) informed about the intent of the meeting, (2) asked to provide feedback on existing issues within the study area, and (3) evaluate alternative concepts for safety improvements along the corridor.

Approximately 25 citizens attended the public meeting, with many expressing a desire to reduce access to the community due to high volumes and speeds associated with the schools in the neighborhood. The speed table locations presented were met with general agreement, with many citizens interested in finding more locations for traffic calming alternatives.

A number of pedestrian/bicycle safety issues were discussed at various intersections within the study area, either due to the limited shoulders or poor sight distance. The depth of ditches along many roadways within the study area create a hazard, as most shoulders are less than 2' in width.

Citizens expressed a concern about speeding along the Stony Point Road and Margate Drive corridors and through many other segments in the study area. A large amount of cut-through traffic was reported on all side streets. There is no designated travel route to access the schools in the neighborhood, which allows parents and students to utilize the residential streets.

The following locations were mentioned by citizens as locations for traffic calming:

- Garfield Road – Review for speed table between Cedar Grove Road and Traylor Drive
- Margate Drive – Review multiple locations between Duryea Drive and Apache Road
- Hastings Drive – Review for speed table between Hobby Hill Road and Apache Road
- Convert intersection of Wainfleet Drive/Apache Road/Hastings Drive to 4-Way Stop
- Convert intersection of Margate Drive/Duryea Drive to 3-Way Stop
- Convert Apache Road northbound approach at Traylor Drive from Yield to Stop
- Perform additional speed study or traffic calming on Cherokee Road

The feedback from this meeting was incorporated into the traffic calming review for proposed improvements in the study area.

Conclusions

After a review of the traffic volumes, speed data, and geometric limitations of the Huguenot and Westchester Neighborhoods, it has been determined that there are a number of locations for potential traffic calming improvements within the study area that will create a safer, more accommodating neighborhood. The existing corridors have narrow travel lanes, limited/no shoulders, and non-traversable ditches, which make bicycle and pedestrian travel unsafe and infrequent. There are no direct routes and traffic utilizes the multiple available roadways to travel into and out of the neighborhood.

In addition, there are a number of sight distance concerns along roadways within the study area which may need to be addressed via changes to the speed limit, geometric curvature of the roadway alignment, or removal of foliage. The sight distance issues noted at multiple intersections along the corridor pose significant safety impacts.

The first recommended improvement to install seven (7) speed tables within the study area. The speed tables should be installed at the following locations:

1. Cedar Grove Road, between Oldham Road and Twin Valley Road;
2. Cedar Grove Road, between Merrimac Road and Garfield Road;
3. Evansway Lane, between Hobby Hill Road and Westgate Drive;
4. Evansway Lane, between Ragsdale Road and Klondike Road;
5. Stoney Point Road, between Domino Road and Whitehorse Road;
6. Duryea Drive, between Merrigan Road and Epsilon Road; and
7. Garfield Road, between Garden Road and Cedar Grove Road.

Installation of a speed table will require additional survey/GIS and engineering efforts to complete the required design and address drainage impacts and other concerns; this will have an approximate cost of \$25,000 for all recommended locations. The typical cost for a single speed table is approximately \$15,000, assuming there are no drainage issues or other constructability issues.

The second recommended improvement is to install "Additional \$200 Fine Signs" within the study area, either in conjunction with neighborhood traffic calming installations, or as standalone signs, to disincentivize drivers from speeding. This treatment has been applied at other locations within the City of Richmond, notably on Cherokee Road between Huguenot Road and Forest Hill Avenue. Installation of the "Additional \$200 Fine Signs" is approximately \$250 per sign and can be installed at all locations that the City authorizes the use of the higher fines.
