The State Environmental Review Process (SERP) for the referenced project has been completed and State natural resource agencies have had opportunity to comment on the project.

The Preliminary Environmental Inventory (PEI) for the project is attached. The PEI contains information about the environmental resources in the project vicinity and summarizes any commitments identified for the project as a result of the SERP. The PEI is based on current project parameters, as described in the Project Early Notification (EQ-429). Changes to the project scope can influence the information provided in this PEI and the results of this environmental review. The Richmond District Environmental Section must be advised if the project scope changes.

This administratively concludes the SERP, however; other environmental clearances and reviews may be necessary. Please forward this SERP Closure Memorandum and PEI to others involved in the project, as you deem appropriate. Please call me if you have questions or comments regarding this project. I can be reached at (804)524-6012 or via email at Palmer.Stearns@Virginiadot.Org.
