Glen Allen, VA 23060

***Re: Integrated Annual Report for the City of Richmond Municipal Separate Storm Sewer System (MS4) and the Combined Sewer System (CSS), Permit No. VA0063177***

Dear Ms. Abel,

As required by the Virginia Pollution Discharge Elimination System permit issued to the City of Richmond Department of Public Utilities in October 2018, the City submits its Integrated Annual Report for both the Combined Sewer System and the Municipal Separate Storm Sewer System for the permit period January 1, 2021 through December 31, 2021.

The city appreciates the opportunity to continue to report on our activities under the first ever integrated permit in the Commonwealth of Virginia.

Please contact me if any further information is required.

Thank you.

Sincerely,

April N. Bingham  
Director

# General Information

### Permittee Name

City of Richmond

### System Name

City of Richmond, Department of Public Utilities (DPU)

Richmond Wastewater Treatment Plant (WWTP), Richmond Combined Sewer System (CSS) and Richmond Municipal Separate Storm Sewer System (MS4)

### VPDES Permit No.

VA0063177

### Reporting Period

January 1, 2021 through December 31, 2021

### Certification Statement

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

April Bingham, Director of Public Utilities

Date

## Section 2

# Combined Sewer System (CSS)

The metered results of the volume and number of overflows for each combined sewer overflow (CSO) outfall based on the measured storm event data for the 2021 reporting period is presented in Tables 2-1 and 2-2 below, respectively. A map of the CSS outfalls is presented in Appendix A.

### Section 3

# CSS and MS4 Nine Minimum Controls (NMC) and Six Minimum Controls (MCM)

## 3.1 Operation and Maintenance of the CSS (NMC 1)

### 3.1.1 Inspection and Maintenance of CSS Control Structures and Pump Stations

The City follows a regular schedule for inspection and maintenance of regulators, CSO outfalls, and pump stations. The schedule of performance of the City’s O&M program is summarized in Table 3-1 and 3-2 below. Equipment inspection, screen cleaning and debris removal are part of the regular activities.

CSO Control Structures	Inspection Interval	Maintenance	
		Interval	Type
Dry Weather Regulators (29) Wet Weather Regulators (10)	Monthly	Monthly	Preventative Maintenance
CSO Outfalls (25)	Monthly	Monthly	Preventative Maintenance

Pump Station	Capacity (MGD)		Estimated Dry Weather Peak (MGD)	Inspection/Maintenance Interval
	Firm	Installed		
Douglasdale	7.5	13.0	2.2	Daily
Hampton/McCloy	0.9	1.7	0.4	Daily
Upham Brook	8.6	13.0	0.3	Daily

If major repairs are deemed necessary at the inspection, a work order is initiated, and the repairs are scheduled. Major repairs may be handled by the City’s maintenance department or by outside contractors.

### 3.1.2 Sewer Flushing and Cleaning

The City follows a regular schedule for routine sewer line flushing and cleaning. Maintenance activities performed on the collection system during the 2021 reporting period are summarized in Table 3-3 below.

Activity	Interval	Quantity
Sewer Cleaning	Annually	33.1 miles
CCTV Inspection	Annually	33.8 miles

### 3.1.3 Catch Basin Cleaning

The City follows a regular schedule for routine catch basin cleaning. The City cleaned 4,502 catch basins throughout the CSS during the 2021 reporting period.

## 3.2 Use of Collection System for Storage (NMC 2)

### 3.2.1 Information regarding storage at Shockoe Retention Basin and Hampton/McCloy Tunnel

Storage is provided in the Shockoe and Hampton/McCloy CSO areas through existing retention facilities.

- The Shockoe facilities serve about 8,000 acres of the CSS and comprise a 35 million gallon (MG) retention basin with upstream in-line storage of approximately 15 MG in diversion structures and arch and box sewers.
- The Hampton/McCloy tunnel serves about 1,012 acres of the CSS and comprises a 7.2 MG retention tunnel.

### 3.2.2 Sewer Re-lining Activities to reduce Inflow and Infiltration (I/I)

The City implements a sewer lining program annually to reduce I/I. The City lined 16,430 feet of sewer during the 2021 reporting period.

### 3.2.3 Operation of WWTP influent pumping to fill intercepting system

During wet weather events the Main Pumping Station is operated at 140 MGD to maximize flow to the WWTP. As the wet weather event continues, combined sewage is stored in the interceptor system before overflows occur. Portions of the intercepting sewers that convey flow to the WWTP are located at elevations below the lowest CSO outfall overflow elevation. The majority of these low-lying intercepting sewers are in the Shockoe CSO drainage area where the lowest overflow elevation is 1.00 feet. Table 3-4 below summarizes the intercepting sewers below the lowest CSO overflow elevation and the corresponding estimated storage capacity.

Intercepting Sewer	Diameter (inches)	Length Below (EI + 1.00 (feet)	Storage Capacity (MG)
Lower Goodes Creek	72	10,905	2.61
Twin River Crossings	66	1,100	0.39
Hull Street	60	2,700	0.40
Shockoe	96	2,700	1.02
Gillies Creek	60	2,500	0.37

Intercepting Sewer	Diameter (inches)	Length Below (El + 1.00 (feet)	Storage Capacity (MG)
Northside CSO Conveyance (1)	96, 84, 60	2,850	0.89
Total			5.68

(1) Northside CSO Conveyance stores CSS to an elevation of 16.0 feet

### 3.2.4 Tide Gate Inspections

The City routinely inspects and makes necessary repairs to tide gates to reduce tidal intrusion into the collection system. The City follows a regular schedule for inspection and maintenance of tide gates. The schedule of performance of the City’s O&M program is summarized in Table 3-5 below. Equipment inspection, and debris removal are part of the regular activities.

Gates	Inspection Interval	Maintenance	
		Interval	Type
CSO 04 (Bloody Run) Tide Gate	Monthly	Monthly	Preventative/Corrective Maintenance
CSO 05 (Peach Street) Tide Gate	Monthly	Monthly	Preventative/Corrective Maintenance
CSO 06 (Shockoe) Tide Gates (6)	Monthly	Monthly	Preventative Maintenance
CSO 14 (Stockton Street) Tide Gate	Monthly	Monthly	Preventative Maintenance
CSO 15 (Canoe Run) Tide Gate	Monthly	Monthly	Preventative Maintenance
CSO 16 (Woodland Heights) Tide Gate	Monthly	Monthly	Preventative Maintenance
CSO 17 (Reedy Creek) Tide Gate	Monthly	Monthly	Preventative Maintenance
CSO 18 (42 <sup>nd</sup> Street) Tide Gate	Monthly	Monthly	Preventative Maintenance
CSO 19 (Hampton) Flap Gate (2)	Monthly	Monthly	Preventative Maintenance
CSO 20 (McCloy) Flap Gate (3)	Monthly	Monthly	Preventative Maintenance
CSO 21 (Gordon Avenue) Tide Gate	Monthly	Monthly	Preventative/Corrective Maintenance

### 3.2.5 Use of Public and Private Stormwater Facilities in the CSS Area

Local retention facilities provide additional stormwater storage in the CSS area. Examples of these types of facilities are shown in Table 3-6 below.

Site	Location	Owner
Brander St. Pump Station Holding Pond	Brander St.	City
Gordon Ave. Pump Station Holding Pond	Gordon Ave.	City
DPU Operations Parking Lot	Commerce Rd.	City
Sonoco Products Company	Commerce Rd.	Private (1)
BP Products North America	Commerce Rd.	Private (1)

Table 3-6. Local Stormwater Retention Facilities in the CSS Area		
Site	Location	Owner
Citgo Petroleum Corporation	Maury St.	Private (1)
First Energy Corporation	Maury St.	Private (1)
Magellan Terminals Holdings, L.P. Richmond Terminal	East First St.	Private (1)
Transmontaigne Terminating	Commerce Rd.	Private (1)

(1) Industry that retains stormwater on-site during wet weather events and control releases to permit limits at the WWTP

### 3.2.6 Use of Real Time Decision Support System to manage flows during CSO Events

DPU utilizes 50 depth sensors, 23 flow meters, and 10 rain gauges (shown below in Figure 3-1) to monitor the collection system.

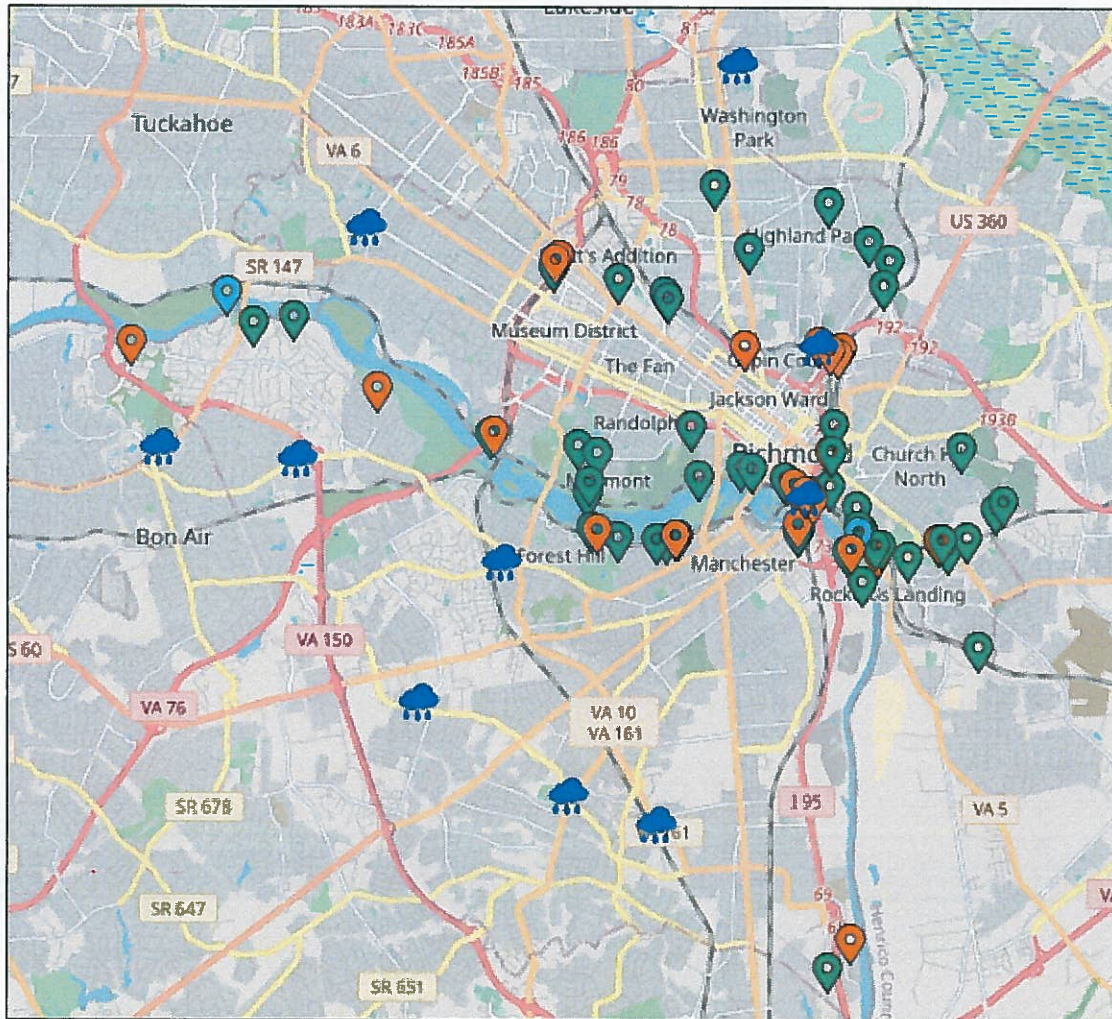

Figure 3-1: Collection System Monitoring System

The data can be displayed in real time, as shown below in Figure 3-2.

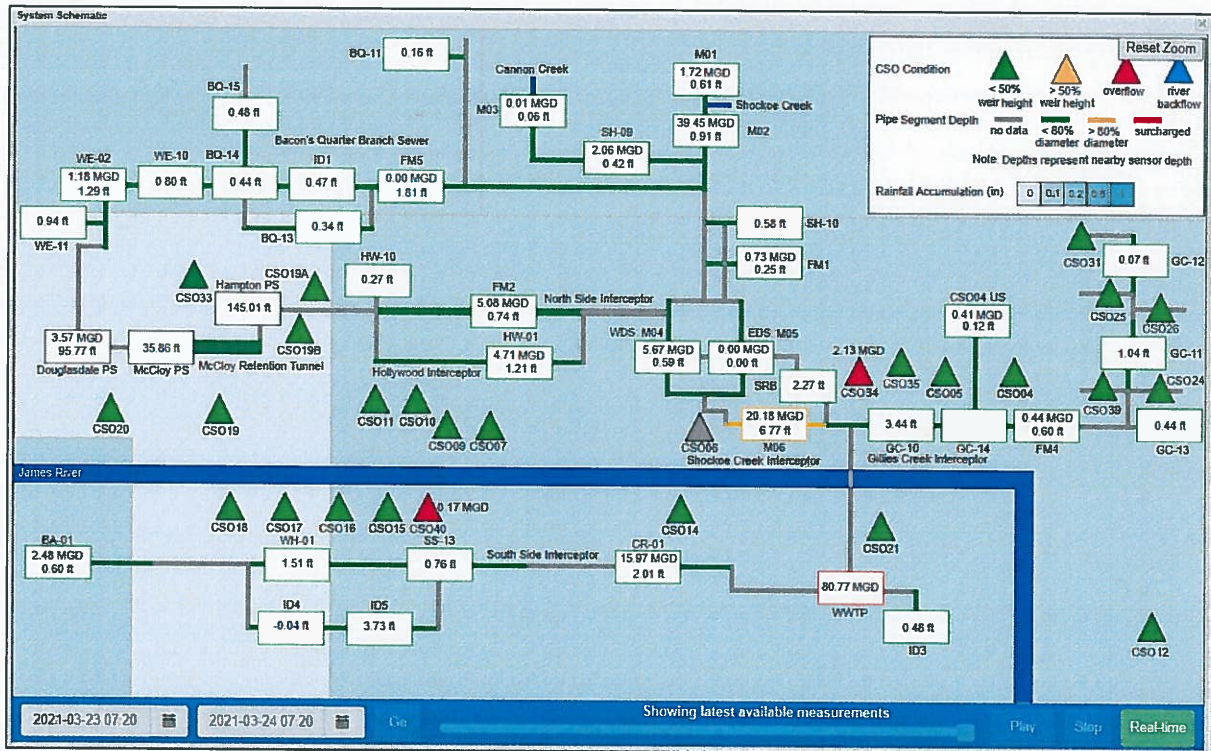

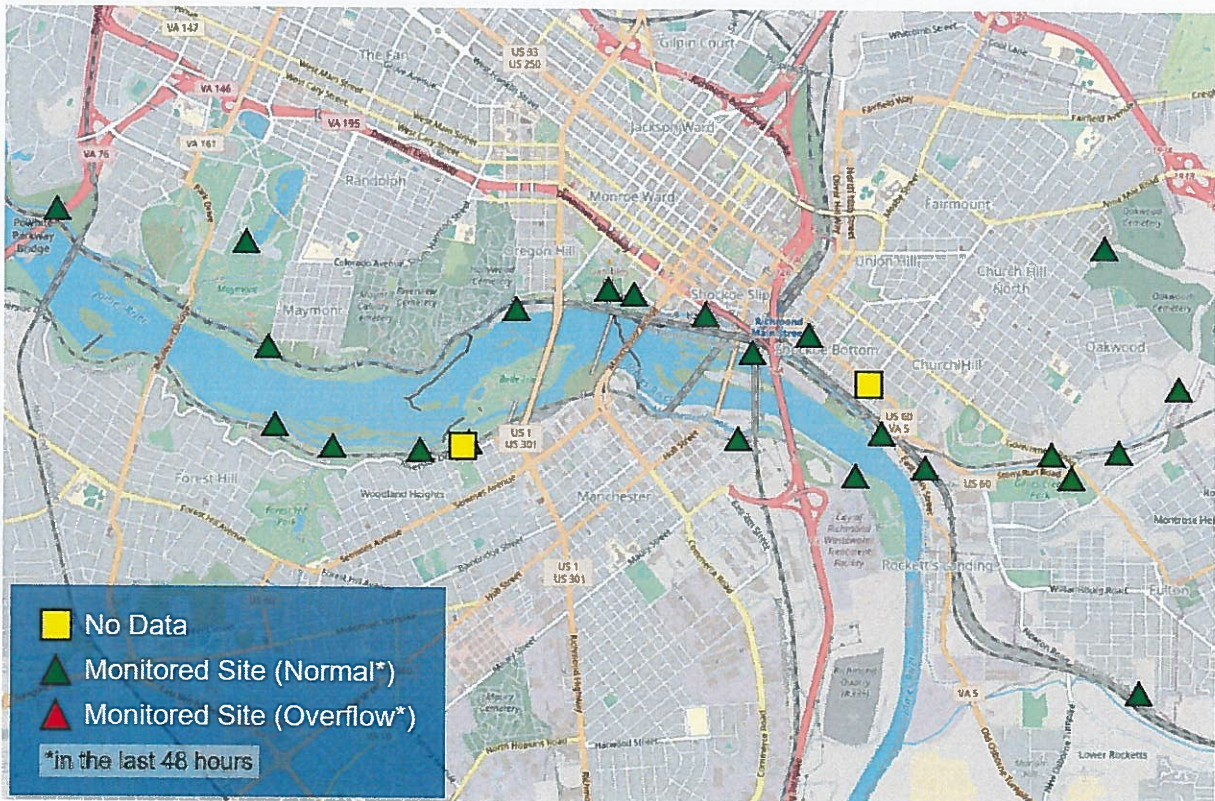

Figure 3-2: Real Time Collection System Data Display

The collected data is also utilized in the *Richmond CSO Map Notification*, which is available to the public (on the city's website) and displays outfalls that are currently overflowing or have overflowed in the past 48 hours.

**Figure 3-3: Richmond CSO Notification Map**

### 3.3 Review of Pretreatment Program (NMC 3)

#### 3.3.1 Changes or Use of Pretreatment Program Authority to minimize flows during CSO Events

The City administers an industrial pretreatment program as required by the VPDES permit. Industries discharging to the CSS retain stormwater on-site during wet weather events and control releases to permit limits at the WWTP. Information on individual industries which utilize retention facilities is summarized in Section 3.2.5 – Use of Public and Private Stormwater Facilities in the CSS Area. Each industry is issued an Industrial User Permit which includes a section on Discharge of Stormwater. The below statement was added to the Industrial User Permits:

E. Storm water runoff collected within the containment dike structure shall be released to the City's Treatment System in accordance with the following criteria:

1. There shall be no discharge of floating solids, visible foam or oily sheen in other than trace amounts; and
2. During storm events where the accumulation of rainfall is in excess of 2.2 inches; the permittee will use the installed precipitation gauge system to determine the volume of rainfall at the terminal; which would then trigger the terminal to call the City of Richmond's Department of Public Utilities Publicly Owned Treatment Works (POTW) at (804) 646-8721 to inform them of the level of rainwater retained in the diked area. It is at this time that the POTW will advise whether the plant is able to handle your facility's effluent. Nevertheless, neither your facility's nor the POTW's welfare will be jeopardized.
3. The Terminal Manager shall contact the City's Environmental Compliance Officer on 804.646.8661 and notify him/her of the intent to discharge, at least 24 hours prior to initiating any discharge other than in 2 above.

During this reporting period, there have been no additional changes to the program to minimize flow during a CSO event.

### 3.4 Maximize Flow to the WWTP for Treatment (NMC 4)

#### 3.4.1 Operation of WWTP during Precipitation events to show Maximization of Treatment of Wet Weather Flows

The City maximizes flow to the WWTP during wet weather events by performing the following actions:

- Influent flow at the WWTP is increased to 140 MGD in wet weather conditions (see Figure 3-4).
- Flows up to 140 MGD are treated at the WWTP to permit limits.
  - 75 MGD receives Primary, Secondary, Tertiary and UV Disinfection
  - 65 MGD receives primary treatment and UV disinfection
- Combined sewage is stored in the Shockoe Retention Basin (see Figure 3-5), Hampton/McCloy Tunnel (see Figure 3-6) and the collection system prior to overflow.
- The Shockoe Retention Basin and Hampton/McCloy tunnel are drained as soon as possible once overflow conditions are concluded. During the draining process the WWTP continues to operate at 75 MGD.

Investigation Identifier	Incident Report Date	Incident Location	Incident Summary	Resolution Summary	Follow-Up Summary	Closure Date
01122021 MRDO	1/12/2021	13 N. 17th Street, Richmond, VA 23219	Forward an email from Leonardo Lockett of a citizen reporting oil discharged into a storm drain	Upon arrival it was determined that the restaurant has a leaking oil recycling container. Notified the business owner of the issue and scheduled an inspection of the site with owner. During inspection the owner had employees to began cleaning up residual grease and contacted the Valley Protien to bring out a new recycle bin.		1/14/2021
02042021 MRDO	2/4/2021	805 Catherine St, Richmond, VA 23220	Forward a ticket from Leonardo Lockett of a citizen reporting motor oil instorm drain	Upon arrival although there were signs of oil spilled on the ground there were no signs of it being poured into the storm inlet		2/24/2021
02042021 Illicit Discharge	2/4/2021	3206 Landria Dr, Richmond, VA 23225	Received a call from one of the field crews reporting a suspicious pipe leaving a house and discharging			
02172021 Illicit Discharge	2/17/2021	1116 Main Street, Richmond, VA 23219	Received a call from the Stormwater Group of a leaking grease bin	Upon arrival although there were signs of oil spilled on the ground there were no signs of it reaching the storm inlet		2/17/2021
02262021 MRDO	2/26/2021	24 W. Brookland Park Blvd, Richmond, VA 23222	Forwarded a email from Leonardo Lockett of paint running from a construction dumpster into a stormwater inlet	Contacted owner and he had his crew clean up the paing and debris also stomrwater crew vac out stormwater inlet of sitting paint		2/26/2021
03172021 MRDO	3/17/2021	Fulton St and Goddin	Contacted by Sewer crew of concrete in the inlet pipe	After arriving on site and further investigation it was determined that this was not an illigal dumping but part of an ongoing demolition project of several sewers including DI's connected to the existing system and slated to be abandoned.		3/17/2021
3192021 MRDO	3/19/2021	3302 Maryland Ave, Richmond, VA, 23222	Forward an email from Leonardo L. of a citizen of suspected illicit discharge into the street	After investigation of the site there was illicit discharge of sewer from the house to the street. i worked with the owner and the neighbour to resolve this issue with a plumber clearing their sewer system line. The sewer line was cleared, and had been flushed and the owner was instructed to throw lime on the material that was discharged from his house.		3/22/2021
03232021 MRDO	3/23/2021	24 W. Brookland Park Blvd, Richmond, VA 23222	Stormwater crew conducting follow up assessment from 02/26/2021 noticed paint leaking from a construction dumpster	Upon arrival material had already been cleaned up		3/23/2021
03262021 Illicit Discharge	3/26/2021	9th and Marshal st	Forward a call of a citizen of suspected illicit discharge into the street drains	Intial investigations showed signs of concrete solidyfyng at drain. the city of richmond cleaned and got rid of the clogged drain issue, i also checked on monday to make sure they have put new socks in the area, and have cleaned the area.		

Investigation Identifier	Incident Report Date	Incident Location	Incident Summary	Resolution Summary	Follow-Up Summary	Closure Date
06072021 Illicit Discharge	6/7/2021	118 3rd st	Citizen called regarding storm drain issues not working properly.	The store located "Valentino's pizza" was creating the issue. due to the fact their trash cans and oil bin was so close to the storm drain. We advised on relocating of the items in the area since it was blocking the drain. we also stoped from draining of the mop bucket waste into the drain by informing of its illgal nature.		6/20/2021
06162021 Illicit Discharge	6/16/2021	7543 Rockfalls Drive, Richmond, VA 23225	Received a report of a basement sump pump discharge into backyard	Upon further investigation it was determined that this was just collected groundwater from the basement sump and being discharged to the stormwater inlet in the back of the house		7/7/2021
06242021 Illicit Discharge	6/24/2021	Formex st	Three drums of oil was seen in the area with leaking some from one or two of them	We located the drums in the area and fixed the issue. by getting the drums first removed from the area then contracting to a proper disposal of the materil 3rd company.		6/24/2021
7082021 Illicit Discharge	7/8/2021	Arco Iris	A clogged from runoff of the facility to the drains were reported by Storm water crew	Intial inspection of the facility was done. it was found that the facility has been using improper way to dispose the items of trash debris and oil. the bins and recycling materials were left all around the facility. This made it to the creek just behind the business and clogged the water way in resulting a flood of waste and other materials to the area. the owner was informed to clean the area from debris that will clogged the drain. dispose of the material proper way and put the oil and grease inside the oil and grease bins.	All items were cleaned pictures of the area was send and is in file for reference purpose.	7/16/2021
07122021 Illicit Discharge	7/12/2021	3700 S. Belmont Rd.	Forwarded a citizen complaint of bad odor coming from creek	Upon arrival noticed a strong sanitary smell flowing from the branch on Pocosham creek that flows from Chesterfield County spoke with Supervisor Mr. Chris Clemons who is immediately dispatching a crew to assess the issue on there end.		7/13/2021
09012021 MRDO	9/1/2021	2301 W. Main St, Richmond, VA 23220	Forwarded an email from VDH of complaint ablut dumping in the alleyway	Upon arrival we could not located any signs of dumping and there were no storm drains in the area		9/1/2021
09242021 MRDO	9/24/2021	15 N 17th street, Richmond, VA 23219	Report of leaking Grease Bin	Location is with in theh combined sewer area had the owner remove damaged bin and power wash surrounding area		10/6/2021
