

# STAY UPDATED, STAY INFORMED, STAY READY

## Sign up for City of Richmond Department of Public Utilities Utility Work Impact Notifications

The City of Richmond Department of Public Utilities manages various projects, including emergency repairs, maintenance and other critical infrastructure and capital improvement projects. These projects can cause temporary and long-term road closures, traffic pattern changes, increased noise levels in residential areas and disrupt your daily routine. We know these disruptions are never pleasant to experience, but we want to keep you informed.

**CivicReady** is a notification system that informs users about service outages, road closures and other events. This allows us to send information directly and in real time to those in the impacted area. To sign up for those alerts, and to stay informed and updated on ongoing projects see the resources on the back of this page.
